

Founded in 1918 The Crimea State Medical University is one of the oldest medical universities in Russia. Nowadays The Crimea Medical University provides medical education up to the latest data and highest world educational standards. In the same time the University keeps upgrading the teaching methods towards global trends in medical education and research, training medical students for the health care in Russia.

The University started to admit the international students for more than 80 years ago. Since 1999 English has been the second language of instruction, which makes international students even more comfortable to study at the Crimea State Medical University. The excellence in teaching at CSMU has been recognized by Medical Council of India (MCI), UNESCO, WHO, General Medical Council, International Educational Society (IES). The University has been also awarded the title of laureate in the rating of higher medical institution "Sofia –2004" due to the constant cooperation development with foreign countries and high quality of education.

### ***FROM THE RECTOR DESK***

**Sergey Donich,**  
Doctor of Sciences in Medicine,  
Professor, Rector

The history of the conception and development of the academies is entwined with the history of Crimea. It was the complicated, trouble stricken and eventful 20th century that saw the development of forward-looking educational institutions in the Republic of Crimea, which, in their relatively brief period of existence, managed to gain success and respect in scientific and academic circles, made an invaluable contribution to the development of global and national science, and produced a number of prominent scientists, writers, and public figures.

The University maintains strong relations with its international partners in the framework of various research projects, students and faculty internship programmes.

Today, V.I. Vernadsky Crimean Federal University trains future professionals using novel opportunities that meet high-level national and global standards in education. The number of

these opportunities has increased significantly with the establishment of the new federal-level university through the merger of leading Crimean universities. V.I. Vernadsky Crimean Federal University has developed into a major research and science centre and a source of pride for the Russian Federation and the Republic of Crimea.

## OUR MOTIVE

- To provide educational programs that enable medical students to master all branches of medicine and health care skills;
- To prepare medical students to demonstrate competence in their fields of study at appropriate degree levels and to encourage excellence in student learning;
- To develop programs oriented to the most urgent needs of the region's health care;
- To provide graduate and continuing educational programs for both professional advancement and personal enrichment;
- To encourage and provide essential support services for creative activities and research;
- To provide a variety of public services to enhance the well-being of the medical school and its Community;
- To provide leadership and planning for future development.
